The appearance of a company's name or product in this database does not in itself assure that products so identified have been manufactured under UL's Follow-Up Service. Only those products bearing the UL Mark should be considered to be Certified and covered under UL's Follow-Up Service. Always look for the Mark on the product.

UL permits the reproduction of the material contained in the Online Certification Directory subject to the following conditions: 1. The Guide Information, Assemblies, Constructions, Designs, Systems, and/or Certifications (files) must be presented in their entirety and in a non-misleading manner, without any manipulation of the data (or drawings). 2. The statement "Reprinted from the Online Certifications Directory with permission from UL" must appear adjacent to the extracted material. In addition, the reprinted material must include a copyright notice in the following format: "© 2020 UL LLC"

TEOU2.GuideInfo - REPACKAGED RECOGNIZED COMPONENTS

Repackaged Recognized Components

The devices covered under this category are incomplete in certain constructional features or restricted in performance capabilities and are intended for use as components of complete equipment submitted for investigation rather than for direct separate installation in the field. THE FINAL ACCEPTANCE OF THE COMPONENT IS DEPENDENT UPON ITS INSTALLATION AND USE IN COMPLETE EQUIPMENT SUBMITTED TO UL.

GENERAL

This category covers repackaged Recognized Components that would not contain the required Recognition Mark and/or Recognized Component Marking (i.e., the Recognized company's identification and catalog designation) after repackaging or reprocessing.

Appliance wiring material subjected to processing or respooling subsequent to its manufacture is covered under Processed Wire (ZKLU2).

REQUIREMENTS

The basic requirements used to investigate products in this category are contained in Repackaged Product Program Requirements at www.ul.com.

UL MARKING

Repackaged components Recognized under UL's Component Recognition Program are identified by markings consisting of the Recognized company's identification and catalog, model or other product designation, the repackager's name, and the component product identification. In addition, the Recognized Component Mark  will appear on the smallest unit container or other repackaging means.

The Listing or Classification Mark of UL is not authorized for use on, or in connection with, Recognized Components. Only those components that actually bear the "Marking" should be considered as being covered under the Component Recognition Program.
